Rat-O-Gran

Rodent Proofing
Rats are no respecter of property. Regardless of seat and tidy a home may be there are entrances which rats may gain access house, rats will invade home. This is especially all forms of food and are eliminated outside home. Thus it is important each home in our community rodent proofed.

Since young rats can enl opening of only a half-inch diameter, all edges subject gnawing such as door edg window sashes should be tected with metal flashing hardware cloth. Basement ors that are not concrete shallow foundations should protected with a curtain wall stone or hardware cloth holes in masonry and wood should either be filled hardware cloth, protected metal or touched up with crete. All floor drains should be covered with metal open with 1/4" slots to prevent from climbing through drain. All utility entrances the house, for water and electricity, and pipes should tightly plugged with hair cloth, concrete or protective sheet metal. Any area where food is stored, especially farm should be protected. The next extending at least 2 feet up from the ground.

If each building owner in county takes these precautions then rats will not be able find their way into their and businesses. If the pre in and around these homes businesses are neat and then there will be no place a rat to find food and sh and if a rat cannot find and shelter, like all other mals, he cannot survive these ways we can help our munity of the rodent prob
